

Drip Irrigation System Header

Attach to a...

hose bib/garden valve or...

$\frac{3}{4}$ " anti-siphon valve...

and, you're ready to connect your drip irrigation system!

Includes:

- Vacuum Breaker (backflow preventer)
- Fertilizer Injector (pint capacity)
- Filter (stainless steel element)
- Pressure Regulator (set at 19 PSI)
- $\frac{3}{4}$ " PVC Adaptor Fittings

Brass hose bib and anti-siphon valve are NOT included!

The **Drip Irrigation System Header** makes setting up a drip irrigation system extremely easy! It attaches directly to a hose bib/garden valve or $\frac{3}{4}$ " anti-siphon valve, and comes complete with a vacuum breaker, pint capacity proportioning fertilizer injector, 'tee' filter with 150 mesh stainless steel element, a 19 PSI preset pressure regulator, and $\frac{3}{4}$ " PVC adaptor fittings. All that's needed is a poly hose adaptor with female hose threads that screws onto the Drip Irrigation System Header, to which you can attach whatever size polyethylene hose you wish to use as a mainline.
